## Overview of standard apps

APP	SHORT DESCRIPTION
Product texts & languages for online shops	Customize product texts for different stores.
Matrix products	Edit variants of items with different properties (e.g. color, size) simultaneously using a matrix.
Price list	Display all prices associated with a customer as a tab in the address.
EAN Generator	Import EAN numbers using a CSV file.
Document importer	Import old receipts using a CSV file.
Data browser	Search receipts and download them as needed.
Inventory	Perform inventory on a warehouse by warehouse basis through the use of barcode scanners.
Accounting Export	Export accounting data for DATEV, SAGE and BMD via interfaces.
Delivery Threshold app	Define delivery thresholds for a specific country or for a specific item.
Liabilities	Manage the payables to a vendor and, among other things, check the invoice receipt or file the scanned invoice to the related payables.
Order proposal email	Send you order suggestions by e-mail and receive information

	about the current stock quantity and the difference from the minimum stock.
Goods Receipt document	Quickly create purchase orders and choose how much merchandise to use from which supplier.
Request	Manage inquiries by customers and convert them into an offer later if needed.
Contract/Price request for Order	Forward orders/price requests individually as purchase orders and display the various suppliers with existing prices if required.
Update Product position	Get an extra button in the draft mode of documents to update the positions with this module.
Interface for Billbee	Import orders from the Billbee inventory management system into Xentral.
Amazon invoice	Create invoices and credit notes for Amazon orders as an Amazon seller with this module.
Inbound Payments	Import current bank statements from business accounts to link incoming payments to open orders for later account assignment for accounting export.
SEPA payment transactions	Pay or collect amounts or use the possibility to create a liability directly in this module.
Interface for Klarna	Use the interface to Klarna and transfer among other things the tracking number and delivery confirmation via the Klarna API.
Interface for PayPal Plus	Payment methods as type "PayPal Plus".
Dispatch splitting	Allocate postage costs either by tax rates or by the value portion of the tax rates.
Extended Proforma Invoice	Work with pro forma invoices by checking "Pro forma invoice".
Picking sticker	If you need a label for a box of the delivery during picking, you can print a label based on the barcode of the delivery bill.
Document Management (save, delete)	Define (per position) from which shelf which quantities are stored or retrieved.
Dropshipping Supplier	Send copies of various receipts automatically to stored e-mail addresses or even printers.
Recipients copy (rent)	Automatically send copies of various receipts to stored email addresses or even printers.
Parcel delivery list	Gives you an overview of all shipped packages including the number of items.
Packaging Configuration	Manage and configure your boxes.
DHL Express	Connect your DHL Express account to Xentral and print express parcel stamps.
Parcel Stamp DHL	Connect DHL Shipping to Xentral.
Parcel Stamp DPD AT	Connect DHL.AT Shipping to Xentral.

Process Starter Auto Shipping Plus	Use process starters to perform automatic processes and calculations in the background of Xentral, either at a specific time of the day or in the set period in minutes. Tasks that process starters perform include automatic import of orders from online stores, inventory calculation and storage of daily stock values, automatic bulk emailing, transfers to logistics in auto-shipping with stock changes and document creation, backups set up.
Ticketing system	Use the ticket system as a central interface to the customer and take advantage of the benefits it offers compared to conventional e-mail communication.
